

WEST CENTRAL TEXAS COUNCIL OF GOVERNMENTS

Planning - Training - Community Development - Human Services

March 5, 2014

To whom it may concern,

I am writing to express my support of Harris Broadband's Fiber to the Home proposal for Early, Texas. In my opinion, the community of Early would benefit from a Fiber-to-the-Home (FTTH) network to provide broadband infrastructure. The development of this network should create opportunities for economic development and improved quality of life in the Early community. It is my understanding that such a service is currently not available.

Harris Broadband has provided technology and business services in the contiguous community of Brownwood, Texas for the past nine years.

The successful implementation of this project will help meet the Early community's communication needs now and in the future.

Sincerely,

Tom K. Smith
Executive Director
West Central Texas Council of Governments

To whom it may concern,

I am writing to express support of Harris Broadband's Fiber to the Home proposal for Early, Texas.

The community of Early needs a Fiber-to-the-Home (FTTH) network to prove broadband infrastructure. This will create opportunities for economic development and improved quality of life in our community. We cannot get this service delivered by incumbent providers.

Harris Broadband has proven its technology and business care in the contiguous neighboring community of Brownwood for the past nine years.

This project will help meet our community's communication needs now and in the future.

Sincerely,

A handwritten signature in black ink that reads "Robert Mangrum".

To whom it may concern,

Ranger College has a desperate need for wired internet service at our location in the Heartland Mall in Early. Working with Verizon has been a frustrating experience for us and we have often commented that we wish Harris Broadband was in Early.

Ranger could certainly use the high speed internet connectivity that a "Fiber-to-the-Home" network could provide. I personally have Harris Broadband service to our house in Brownwood and have never had a problem, not one.

We have had lots of issues with Verizon service at Ranger and found that getting someone to help us solve the problem is a miserable experience with them. It would be great to have a local provider!

I am a satisfied customer and I am looking forward to having Harris Broadband in Early so that the College can enjoy the same quality and service that I do at home.

Sincerely,

Don Bostic PhD
Executive Vice President

To Whom It May Concern:

On behalf of the Early Chamber of Commerce, I am pleased to provide this letter in support of Harris Broadband Company.

The Early Chamber of Commerce knows and understands there is a definite need for another means of providing service to the citizens of Early. For our citizens to have so few choices is not a good choice for relocating to our town. We would definitely support Harris Broadband to extend their fiber operations into Early.

Early, Texas, was one of the few small towns that grew in population in the 2010 US Census. We are still growing and there will be more businesses and homes being built each month.

We are pleased to stand behind Harris Broadband's application and encourage you to fund this very valuable project..

Yours truly,

Wanda Furgason
Executive Director
